PRESS RELEASE

FOR IMMEDIATE RELEASE

Montreal, Canada - June 24, 2026

Digital nomad, singer, and crypto ambassador Helga Norse releases her latest weekly single, Ocean of Ruin today on Spotify and Apple Music. This song is an angry industrial metal track inspired by the Great Pacific Garbage Patch. The largest of the five offshore plastic accumulation zones in the world's oceans is estimated to be twice the size of Texas..

But this release is more than a song. It's an ownership opportunity.

For the first time, Helga Norse offers fans and NFT collectors partial 25% co-ownership of the song's publishing rights and royalties, plus a suite of monetizable perks designed to reshape how artists and fans collaborate.

'Every track I create is more than just a song; it's a chance for fans to own a piece of music history, profit from it, and shape the future of the industry alongside me,' says Helga Norse.

Co-ownership perks include:

- 25% shared ownership of publishing rights and royalties
- VIP roles across social platforms (where applicable)
- Broadcast rights for personal channels and streams
- Exclusive DJ performance rights (live events and radio)
- Usage rights in virtual worlds and metaverse platforms
- Merchandise creation using song lyrics or artwork
- Discounts on official merchandise
- Bonus airdrops tied to performance milestones

This model empowers fans to move beyond passive listening and become active participants in the creative and financial journey of each release.

Ocean of Ruin is released under Dufr Digital Records and is now streaming on all major platforms.
